Front-End Web Developer | Project Manager

Creative and detail-oriented **Front-End Developer** with experience building responsive websites and web applications using **HTML, CSS, JavaScript, Bootstrap, and Wordpress**. Adept at turning complex problems into elegant, user-focused solutions. Passionate about performance optimization and modern UI/UX principles.

WORK EXPERIENCE

NerdzFactory

Technology and Design Intern • March 2025 - Present

Ogudu, Lagos, Nigeria

- Developed and maintained company websites using HTML, CSS, and JavaScript, ensuring responsiveness and optimal performance.
- Conducted manual testing to identify and report UI/UX issues, bugs, and performance inconsistencies.
- Managed and updated web content using WordPress, creating and maintaining pages to ensure a consistent and user-friendly experience across the company website.
- Provided IT support by troubleshooting hardware, software, and networking issues for staff.
- Assisted the Communications Team with design tasks, branding, and digital content creation.
- Collaborated with cross-functional teams to enhance website functionality, security, and content management.
- Created blog and news content templates to improve content structuring across company platforms.

King's Cyber Cafe

Project Manager • September 2023 - June 2024

Remote

- Directed project planning, task assignments, and timeline management for technical and development-focused initiatives.
- Coordinated team progress, compiled project deliverables, and ensured alignment with project milestones and company goals.
- Maintained project documentation and adapted plans to address challenges, supporting team productivity in dynamic project settings.
- Implemented strategies to enhance team collaboration and morale, resulting in improved productivity and job satisfaction.

Adroitsoft Nigeria Limited

Web development Intern • July 2023 - October 2023

Ogba, Lagos, Nigeria

- Acquired advanced web development and design skills by completing hands-on projects, resulting in improved technical proficiency.
- Developed responsive and interactive web pages, collaborating with other junior developers to deliver client-centric solutions.
- Gained proficiency in JavaScript, HTML, CSS, and Bootstrap, and used Git/GitHub for version control and collaborative coding.
- Troubleshooted and resolved website issues, conducted usability testing, and gathered feedback to enhance the user experience.

Cisco

CISCO Networking Academy Trainee • February 2021 - December 2021

Ogun, Nigeria

- Built foundational skills in Python and collaborated with senior developers on networking and programming basics.
- Attended networking sessions to develop essential technical proficiencies.
- Earned certifications in Python Essentials and Linux Essentials, showcasing technical proficiency.

PROJECTS

Designu Website • April 2025

- Built and maintained the official website for **Designu.io**, a digital skills platform.
- Customized themes and layouts to align with brand identity, ensuring responsiveness across all devices.

Tech Stack: HTML, CSS, Custom Plugins, Javascript

Impact: Improved user navigation and helped boost user sign-ups by streamlining the UX flow.

Minimalist Website • March 2025

- Designed a minimal-styled static site to practice clean, whitespace-rich layouts.
- Focused on typographic hierarchy and visual balance. Used only core front-end tools to maintain full control over every pixel.

Tech Stack: HTML5, CSS Grid & Flexbox, Vanilla JavaScript

Impact: Demonstrated ability to create sleek, performance-optimized layouts without relying on frameworks.

Memory Game • October 2024

- Developed a responsive memory card game using **JavaScript**, featuring smooth animations and efficient state management to handle matches and game resets.
- Designed a visually engaging and fully responsive layout, ensuring smooth gameplay and functionality across all screen sizes and devices.

Tech Stack: HTML, CSS, JavaScript

Impact: Delivered a seamless user experience across all devices with a visually engaging layout and optimized gameplay logic.

Pig Dice • September 2024

- Built the game logic using **JavaScript**, implementing turn-based mechanics, dice roll functionality, and win conditions.
 - Refactored the codebase into a modular structure to enhance readability, scalability, and maintainability.
- Tech Stack:** HTML, CSS, JavaScript
- Impact:** Developed a responsive and interactive UI that allows users to roll dice, track scores, and restart games intuitively.

Personal Portfolio Website • September 2024

- Created a modern, responsive portfolio site to showcase my work, skills, and projects.
 - Emphasized clean design and accessibility, with section-based scrolling and project filters.
- Tech Stack:** HTML, CSS, JavaScript, Bootstrap
- Impact:** Increased visibility to recruiters; used as a central hub for all freelance and job applications.

Bank Account Simulator • August 2024

- Developed functions to manage **deposits, withdrawals, and balance inquiries**, simulating real-life bank account operations using JavaScript.
- Integrated a **transaction history** feature to track user activity, promoting transparency and accountability within the system.
- Implemented **input validation and error handling** to ensure accurate data entry and prevent invalid operations.
Tech Stack: HTML, CSS, JavaScript
- **Impact:** Enhanced user trust and reliability by ensuring secure and transparent transaction management, while preventing errors and improving overall user experience.
